The Essence.

How can a busy researcher sort out the staggering amount of information published each year on chromatography, electrophoresis, immunochrometry, molecular biology, and HPLC? One good way is to make sure you have this year's Bio-Rad catalog. It contains the essence of what's new and important in materials, equipment, and systems for these important techniques. And includes detailed applications data to help you use these techniques successfully.

Our annual catalog is but one of many useful tools and services Bio-Rad offers in support of the research chemist. We maintain an extensive library of technical bulletins, applications notes, and practical, step-by-step manuals. Seminars, technical papers, and our popular Bio-Radiations journal also help keep you current. Problems? Our Technical Staff is always ready to answer your questions about products and protocols.

In short, you're not just buying our products, you're buying 30 years of expertise.

Remember, a lot happens in a year. Circle the appropriate reader service number below for your free copy of this year's Bio-Rad catalog, and your subscription to Bio-Radiations.

University Microfilms International
Policy for Announcements in the FJ Calendar

We will consider for advertising in the FJ Calendar any open meeting on a biological topic occurring in any location worldwide. Please send your announcement to the Executive Editor, The FASEB Journal, FASEB, 9650 Rockville Pike, Bethesda, MD 20814, USA. Your announcement should be restricted to: date (include year), title and location of meeting, contact address (with name if appropriate). We will advertise only meetings taking place more than 5 months after the date of receipt of the announcement. Meetings, symposia, and workshops will be included up to 2 years in advance; international congresses will be included up to 3 years in advance.

*Indicates new entry.
