This was the only way we could get everyone into the company picture.

Charles River has facilities all over the world. That means wherever in the world you're located, you can be confident of getting fast delivery of whatever species of animal you need. And thanks to the strict quality controls Charles River maintains at all its facilities, you can also be confident of getting animals of exceptional consistency. So why in the world would you need any other supplier?

For more information, call 1-800-LAB-RATS. Or write Charles River Laboratories, Inc., 251 Ballardvale Street, Wilmington, Massachusetts 01887-0630. FAX phone (617) 658-7132.
Current Contents Search is a versatile online database that gives you access to the tables of contents from the latest issues of more than 4,500 leading scientific journals. It is the online version of the five science editions of ISI's Current Contents®: Life Sciences; Clinical Medicine; Engineering, Technology, and Applied Sciences; Physical and Chemical Sciences; and Agriculture, Biology, and Environmental Sciences. Available through BRS.

Circle 4 on Reader Service Card
At the forefront

—of human genetics

- The American Journal of Human Genetics continues to bring you the central issues in today's human genetics research, with
  - original research articles
  - abstracts of papers presented at the annual meeting of the American Society of Human Genetics
  - review articles, book reviews, and critical commentaries

—with even more

- A new section on human genetics education, edited by Carl A. Heuther, will focus on instruction at the university and professional school level. In addition to major articles on the complex issues that surround genetics education, this section will include reports on instructional innovations and assessments of teaching materials and resources.

—enrichment for your work—

- Beginning in 1988, AJHG will feature a new, larger two-column format.

- The official journal of the American Society of Human Genetics, AJHG is in its thirty-ninth year of recording and reviewing human genetics research and its applications to biomedical science and clinical medicine. AJHG reflects the rapid progress and excitement that pervade this field.

The American Journal of Human Genetics

Editor: Charles J. Epstein, M.D.

Published monthly for the American Society of Human Genetics by The University of Chicago Press

One-year subscription rates: Nonmember Individuals and Institutions $150.00; Students accepted as members of the American Society of Human Genetics only. For student and other membership rates, please write to the American Society of Human Genetics, Administrative Office, 9650 Rockville Pike, Bethesda, MD 20814. Outside USA add $8.00 for postage charges. MasterCard or Visa accepted. Please mail charge card information, purchase order, or check to The University of Chicago Press, Journals Division, Dept. SS7SA, F.O. Box 37005, Chicago, IL 60637.
WOOD/WHELAN INTERNATIONAL UNION OF BIOCHEMISTRY (IUB) AND INTERNATIONAL COUNCIL OF SCIENTIFIC UNIONS (ICSU) RESEARCH FELLOWSHIPS

Objectives
The Wood/Whelan IUB and ICSU Research Fellowships are designed to support biochemists who need to travel to other laboratories in the IUB/ICSU areas for the purpose of carrying out experiments requiring special techniques or for other forms of scientific collaboration or advanced training.

Conditions of the Fellowships
The fellowships will be awarded for short periods (2 weeks to 2 months, exceptionally 3 months). The fellowship will cover travel costs on the basis of economy or tourist fares (coverage will only be partial for long distances). A basic subsistence allowance of US$25/day will be allotted to fellowship holders, with a geographic adaption factor. There will be no additional stipend for dependents and no provisions made for accidental or health insurance, which are expected to be contracted privately by the fellows.

Recipients of the fellowships are required to make a full declaration to IUB/ICSU of all other support received towards the same travel and subsistence. IUB/ICSU may reduce its financial contribution accordingly. IUB/ICSU fellowships cannot be used to supplement other full time/support fellowships.

Applications
Applications should be sent in triplicate with the following documents:

(A) A research proposal of about two pages typescript indicating clearly: (1) the nature of the project and the type of experiments to be carried out; (2) why it is necessary to travel to another laboratory to conduct the experiments rather than to perform them in the applicant’s own laboratory or simply ship the materials; (3) why the particular laboratory has been selected; (4) why the project will require the particular time period requested. If the aforementioned material is not sufficiently clear, the application is likely to be rejected or the decision on it seriously delayed.

(B) A short curriculum vitae of the applicant with a list of publications indicating names and other authors.

(C) A letter of acceptance from the head of the receiving institute and signed by the leader of the group which will receive the recipient.

(D) A letter of recommendation from the head of the department of the applicant’s institution indicating support of the applicant and the reasons why the fellowship would be beneficial. This letter should also list all other fellowships previously received by the applicant, especially for travel abroad to attend meetings or study at another institution.

Applications from Africa, Europe or North America should be sent to Dr. Marianne Grunberg-Manago, Institut de Biologie Physico-Chemique, Fondation Edmond de Rothschild, 13, rue Pierre et Marie Curie, 75005 Paris, France.

Applications from Latin America or Asia should be sent to Dr. Jorge Allende, Departamento de Bioquimica, Facultad de Medicina (Norte), Universidad de Chile, Casilla 6671, Santiago 7, Chile.

Applications can be submitted at any time but they will be reviewed twice each year, in June and December.

Criteria for Selection of Fellows
The criteria for the selection of applicants are:

(1) Excellence of qualifications of the applicant.
(2) Need to travel to do the experiments and availability of other sources of funds to finance travel. Only exceptionally will support be given to senior scientists or to heads of departments. Fellowships will not be awarded to attend courses, symposia, meetings or congresses.
(3) Geographical distribution.
THE JOURNAL OF NUTRITION

The life cycle of a scientific journal is influenced by editors, reviewers, contributors, and subscribers. Some journals thrive; some decline and eventually die. For growth to occur, a journal must meet the needs of its readers, must publish unequivocally good science, and must deliver value for its price. The Journal of Nutrition is growing and thriving; therefore, by definition, it is meeting the needs of nutrition scientists, is publishing high quality nutrition papers, and is giving its subscribers an unquestionable value: over 2,100 8½ x 11” text pages for $80.00 in 1988 (that’s less than 4¢ per page).

Growing a journal is first and foremost a matter of delivering high quality, interesting material, at an affordable price. Editor Lucille S. Hurley has, over the last few years, introduced new features and new directions, making The Journal of Nutrition the foremost in its field today. Rigorously reviewed scientific articles as well as opinions and commentaries on the most controversial issues in nutrition combine to make this journal the one to grow with. Subscribe today for 1988!

Send the following AIN publications:

   Editors: Walter H. Glinsmann, Hiltje Irausquin, and Youngmee K. Park. $15.00

☐ Special Issues in Nutrition: Selected Reprints from The Journal of Nutrition.
   Editor: Lucille S. Hurley. $17.50

   Editor: Orville A. Levander. $15.00

☐ Nutrition Notes (Quarterly Newsletter).
   Editor: Phylis B. Moser-Veilhon. $24.00 a year.

PREPAYMENT REQUIRED.
