HOW FASEB HELPS YOU

In addition to the benefits you receive from being a member in your own professional society, you also receive a variety of important benefits through your society’s membership in FASEB including:

- Access to FASEB’s Legislative Action Center
- FASEB’s Washington Update
- Subscription discounts for The FASEB Journal
- Members only online access to the FASEB Directory of Members
- CME at FASEB Summer Research Conferences and society meetings
- Career development resources
- Personal insurance programs
- Credit card and line of credit programs

Four tenure-track faculty positions in Neuroscience and Cardiovascular Physiology at the Assistant/Associate Professor level are available in the Department of Physiology & Biophysics, Howard University College of Medicine, Washington, DC - USA.

Candidates should have a background in non-human primate and vertebrate neurophysiology with preference in oculomotor/vestibular/cortical anatomy-physiology to participate in establishing a new research center of Cognitive Neuroscience in Motion Perception and Spatial Orientation. Strong background in computational neuroscience is desirable. The research focus of the center will also include aspects of the impact of normal aging, and will aim to develop animal models to understand human pathophysiology and pathology, e.g., spatial hemineglect. Another line of expertise for candidates within the departmental academic program is available in cardio-vascular research, preferably, but not limited to molecular cardiology in areas related to heart failure, cardiac hypertrophy and/or cardiac myopathy. Start-up funds and initial salary compensation will be provided. The candidates are expected to develop their own research programs within the broader programmatic outlines of the Department, and eventually obtain independent funding. Teaching within the College of Medicine’s curricula will be required as needed and in keeping with the candidate’s background. The positions are to be filled during the Academic Year 2007/2008 or later, if no suitable candidates have been identified.

Candidates should send Curriculum vitae, publication list and research interests to: Werner M. Graf, M.D. Ph.D., Professor and Chairman, Dept. Physiology & Biophysics, Howard University College of Medicine, 520 W Street, N.W., Washington, DC 20059 - USA; Tel: (202) 806-6330, Fax: (202) 806-4479, E-mail: wgraf@howard.edu.

Howard University is an equal opportunity employer.

---

Assistant/Associate Professor of Pharmacology & Toxicology

The Department of Pharmaceutical Sciences of the Massachusetts College of Pharmacy & Health Sciences (MCPHS), School of Pharmacy – Boston (SOP-B) invites applications for an Assistant/Associate Professor of Pharmacology & Toxicology to teach in the entry-level PharmD Program, participate in graduate education and to maintain an independent research program.

The successful candidate must possess a Ph.D. (or equivalent) in Pharmacology and/or Toxicology, and appropriate post-doctoral or related training; research expertise in drug metabolism, molecular pharmacology and neuropharmacology, or toxicology preferred; strong evidence of a commitment to scholarship; excellent communication, time management and organizational skills; demonstrated ability to work as a member of a team. An undergraduate pharmacy degree and teaching experience is preferred but not required.

For complete job description and to apply for this position please go to http://jobs.mcphs.edu, click on search positions and enter the following posting number – 0400213. Please attach curriculum vitae, cover letter, a statement of teaching and scholarly interests and contact information for three professional references.

MCPHS is Boston’s oldest college and a vital, growing institution. The Boston campus is located in the Longwood Medical and Academic Area of Boston, which provides excellent opportunities for collaboration with the medical, pharmaceutical and biotechnology communities. The College has an energetic, engaged and diverse student population.

MCPHS is an equal opportunity employer. Applicants who would enrich the College’s diversity are welcome to apply.

LAB ANIMAL RESEARCH EQUIPMENT

NON INVASIVE BLOOD PRESSURE MONITOR: Measures systolic, diastolic, mean blood pressure as well as heart rate of mice and rats. The system works on the tail cuff method utilizing a sensor cuff and occlusion cuff. Can measure 1 to 8 animals and system includes software.

HUMANE ANIMAL TREADMILL: Accommodates 3 rats or 6 mice. Electric stimulus counts the number of shocks & stops at a user-defined number. Features adjustable speed and inclination. Enclosed models also available for VO2/VO2 measurements.

VENTILATOR: Interchangeable pistons that allow for more accurate ventilation volumes (0.3-100mL). Pistons never require lubrication. The breath rate is adjustable 6-200 BPM. As is the inspiration/expiration ratio 0.1 to 1.0.

CLAMS: Comprehensive Lab Animal Monitoring System. Developed in collaboration with the Jackson Laboratory. Can measure up to 11 parameters including VO2/VO2, feeding, drinking, activity, and urine production.

MICROCAPNOGRAPH: Measures end tidal CO2 & N2O in small and large animals (mice, rats, dogs & horses) under anesthesia. Features a very small sample rate (5mL/min@100 BPM to 20mL/min@300 BPM). Data is displayed numerically and graphically on the front panel.

CARDIAC OUTPUT COMPUTER: Measures cardiac output by thermodilution. The system also measures blood pressure & logs HR, suitable for animals ranging in size from mice to horses.
