Division of Infectious Disease & International Health
University of Virginia

Xinhua Chen, PhD
Instructor in Medicine
Harvard Medical School
Beth Israel Deaconess Medical Center

Information regarding the 2010 Grant Program is available this Fall at www.probioticsresearch.com

DANONE is the world’s leading producer of yogurt products, sold under the DANNON and DANONE brand names. Over the past 90 years, DANONE Research has built a vast ‘culture collection’ of bacteria strains that provide the basis for product innovation. Sound scientific research is the cornerstone of DANONE’s focus on the health benefits of probiotics in food.

Yakult Honsha Co., Ltd. contributes to the health and happiness of people around the world through the pursuit of excellence in the life sciences and research on microorganisms. For over 70 years, Yakult has promoted a deep and widespread understanding of probiotics. As of 2009, 28 million bottles of Yakult’s signature probiotic drink are consumed daily in 32 countries and regions, including the United States.

The Global Probiotics Council is a committee established in 2004 by DANONE and Yakult Honsha Co., Ltd., to promote and/or advance the field of probiotics in the world.

Global Probiotics Council
a committee formed by

Young Investigator Grant
for Probiotics Research

Supporting new research on probiotics and gastrointestinal microbiota in the United States with young investigators committed to basic research on gastrointestinal microbiota, probiotics and their role in health and disease.
