Cover Legend: *Allies Day, May 1917*, oil on canvas, 1917 Childe Hassam, (1859–1935). Childe Hassam is considered America’s foremost Impressionist painter. His most celebrated work is a series of thirty flag paintings, of which one was chosen by President Obama to hang in the Oval Office. The image on our cover, the most patriotic of the lot, heralds America’s entry into World War I. On May 9 and 11, 1917 huge parades marched up Fifth Avenue, renamed by Mayor John Purroy Mitchell “Avenue of the Allies” for the occasion. It was a banner event with the Union Jack, French Tricoleur, the Stars and Stripes aflutter in the clear spring air. The exuberance of the scene, looking north towards Central Park from 52nd Street, marks America’s entry into the world community. The painting has, in addition, a subliminal subtext. The flagpoles on the right point directly towards two landmarked buildings, symbols of American wealth, enlightenment and moral values. St. Thomas Episcopal Church stands out in white at the corner of 53rd Street, a French Gothic Revival building, constructed 1911–13 by the firm of Ralph Cram and Bertram Goodhue. Since its inception in 1823, the church has been home to the most prominent and prosperous members of the New York establishment. The University Club, its neighbor on 54th Street, was chartered in 1865 for “the promotion of literature and art.” The Club, an Italian Renaissance palazzo, was built in 1899 by the firm of McKim, Mead and White. It hosts a library, reading room and art gallery, featuring famous American artists. For Hassam, these two buildings are symbols of American exceptionalism: no wonder he gives the American flag pride of place, soaring above all others. This painting is a fitting tribute to celebrate the founding of FASEB in 1912, a banner year for the advancement of American science. Long may it continue to wave!
