FOUNDING & PRESENTING HOST:

LOCKHEED MARTIN
DR. TERRETT LIKES THAT WE’RE NOT FOCUSED. WE LIKE THAT HE NOTICED.

“SciFinder, in the past, had the reputation of being primarily chemistry-focused, but this is no longer the case. In fact, SciFinder covers a multitude of different scientific fields. It covers chemistry; it covers biology and pharmacology. And from my perspective in drug discovery, importantly, it covers many other branches of the life sciences. I use it as much for biology as I do for chemistry.”

Dr. Nick Terrett
Chief Scientific Officer of Ensemble Therapeutics
