If you've missed important findings in the literature, then you haven't been using Reference Update™, the enlightened way to stay abreast of current publications in your field.

Each week, Reference Update™ subscribers receive a single floppy disk (two disks for the IBM® 5-1/4" Deluxe Edition) containing the Table of Contents information from hundreds of publications in biology and medicine. Users create a personalized search strategy consisting of words or phrases, names of authors, and/or journals.

In a few seconds, all references of interest are located and displayed on the screen. References are identified regardless of whether the term is embedded in a phrase, if it is a synonym for another word (e.g., tumor or tumour), or if it is included in the author-assigned keyword list.

For example, a search for ATPase will locate any reference with K+-ATPase, H+-ATPase, or Na+/K+-ATPase. Other services (both printed and diskette-based) would never find these references. Nor do other services include author-assigned keywords; as a consequence, references are missed when using such services.

If finding all references that may have impact on your research is important to you, then Reference Update™ is truly the Clear Choice.

VERSATILE. Automatically prints reprint request postcards or transfers reference directly to our powerful Reference Manager® bibliographic management software. You may also download references to dozens of other data base management programs through the use of a Medline™ formatted file.

AVAILABLE BY MODEM. As the leaders in this field RIS has made Reference Update™ available by modem. Subscribers with a 9600 baud modem may take advantage of this convenient way to obtain their weekly issues without postal delays and at a lower annual subscription price.

CHOICE OF TWO VERSIONS. The Basic Edition includes over 400 journals for an annual subscription rate of $250.00*.

The Deluxe Edition includes over 700 journals for an annual subscription rate of $375.00†. And our coverage is continually being expanded based upon suggestions from our subscribers.

FREE SAMPLE ISSUE. A free sample issue for either the IBM or Macintosh® is available on request. This includes the complete search software limited only in the ability to output references. To receive your issue, or for additional information, please contact:

Attofluor™
Digital Fluorescence Microscopy

CALCIUM  RECEPTORS  pH  IONS

A High Performance - Low Cost Solution for
FAST  Low Light Level Microscopic Imaging

Now image calcium, other ions, receptors and low light fluorescent microscopic images at the touch of a key or mouse button. Attofluor is a harmonious blend of advanced software and hardware developed by atto instruments, inc. for effortless image acquisition, image processing and image archiving on most popular microscopes. On-line image analysis, pseudocolor display, data logging and graphical reporting of calcium concentration (corrected for background and correlated to standards) on whole microscopic fields or on specified areas of interest - while the data is being gathered! Realtime capture and analysis at 50 msec intervals. Automated routines for popular dyes such as Indo-1, Fura-2 and Fluo-3. Attofluor Microscopy Work Station includes state of the art high speed imaging hardware with 9 - 256 intensity level 512x512 pixel frame memory, Attoosoft software for microscopic control and analysis, 2 high resolution monitors, 100 Mb hard disk, Attofluor Dualwave computer controlled Intensified CCD camera and 340/380 nm computer controlled Excitation Source Selector with high speed shutter to minimize fluorescence photobleaching. Options include laser disk archiving recorder, image photo system, additional cameras for either simultaneous dual wavelength fluorescence emission imaging or high resolution phase contrast or DIC imaging.

Because atto instruments, inc produces the complete system, there is effective integration of each of the components - excitation wavelength selection, intensified CCD cameras, imaging computer and software. Attofluor is a high performance turn-key system at a surprisingly low price.

Attocyte™
Xenopus oocyte microinjector

Another turn-key atto product ready for injecting Xenopus oocytes. All operations are computer controlled and the injection volume of 3 to 250 nl per oocyte is positively confirmed by the built in closed circuit video monitoring system. As many as 1000 oocytes can be injected per day. Attocyte Xenopus oocyte microinjector workstation comes complete with dissecting microscope.

Attoflo™
Automated cyclic AMP/GMP RIA

A totally automated 60 sample/hr cyclic AMP or cyclic GMP RIA. The first assay results become available in only six minutes with subsequent determinations appearing once each minute thereafter. Performs the complete assay: pipetting of samples, addition of isotope and antibody, incubation, separation of free from bound radioligand, counting of bound radioligand, and calculations. Higher assay precision and reproducibility than the manual method at less cost than a gamma counter alone!

Circle 2 on Reader Service Card
Eppendorf® spins out two new winners.

Two new Micro Centrifuges that make your work faster, easier, and safer.

One has refrigeration. The new Model 5402 Refrigerated Micro Centrifuge spins heat-sensitive samples at temperatures as low as -9°C,* bringing the cold room to your benchtop.

Both control aerosols. The refrigerated model and the new Model 5415C Micro Centrifuge both use new, easily interchangeable rotors with lids for added quiet, convenience, and safety.

Call 800-645-3050; in New York, 516-334-7500, for more information. Or write Brinkmann Instruments, Inc., Cantiague Road, Westbury, NY 11590. (In Canada: 416-675-7911; 50 Galaxy Blvd., Rexdale, Ont. M9W 4Y5)

*At 12,500 rpm.

Shaping the future with Brinkmann
An issue of Research Communications devoted to the joint US/Soviet space venture, COSMOS 1887, including:

Effects of microgravity on rat body and adrenal weights and plasma constituents. R. E. Grindeland, I. A. Popova, M. Vasquez, and S. B. Arnaud

Altered carbohydrate, lipid, and amino acid metabolism by liver from rats flown on Cosmos 1887. A. H. Merrill, Jr., M. Hoel, E. Wang, R. E. Mullin, J. L. Hamner, D. P. Jones, and I. A. Popova

Effects of spaceflight on the proliferation of jejunal mucosal cells. H. R. Sawyer, C. L. Moeller, R. W. Phillips, and K. L. Simnorn

Histomorphometric and TEM analysis of tibial epiphyseal plates from Cosmos 1887 rats. P. J. Duke, G. Durno, and D. Montufar-Solis

Effects of spaceflight on rat humerus geometry, biomechanics, and biochemistry. A. C. Veilas, R. P. Zernicke, R. E. Grindeland, A. Kaplansky, G. N. Durno, K.-C. Li, and D. A. Martines

Prolonged production 55 hours after a 12.5-day spaceflight. L. P. Garotta, M. R. Gonzales, E. R. Moore, G. Durno, and W. E. Roberts

COVER: Stack plots of images of the human brain using the phase-modulated rotating frame-imaging technique. See Gadoux-Hudson, page 2660.

Designed to report on rapidly changing developments in biological sciences, The FASEB Journal publishes brief, definitive, original research communications and state-of-the-art reviews, as well as editorials, letters, a book list and book reviews, news items, calendar, and public affairs. The views expressed in articles are those of the authors and not necessarily those of the Federation. All manuscripts are subject to review and acceptance by the Editorial Board before publication. Copyright © 1989 by the Federation of American Societies for Experimental Biology. Printed at Lancaster Press, Lancaster, Pennsylvania. All rights reserved. Requests for any reproduction of copyrighted material except the first page of a regular article should be made in writing to the Executive Editor, The FASEB Journal, 9650 Rockville Pike, Bethesda, MD, and should include an explicit statement of intended use and detailed specification of the material to be reproduced. Telephone 301-530-7100. COPYRIGHT: An individual may make a single copy of an article for personal use. The code at the bottom of the first page of an article indicates the copyright owner's consent that additional copies of the article may be made provided that the stated fee is paid through the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970.

Original communications or proposals for reviews, prepared as described in the Information for Authors (see volume 3, no. 1), should be sent to the Editor-in-Chief, Dr. W. J. Whelan, The FASEB Journal, PO. Box 016129, Miami, FL 33101-6129, USA, or if a private courier is used, to the University of Miami School of Medicine, Room 6052, 1600 NW 10th Avenue, Miami, FL 33136-1015, USA.

Business matters should be directed to Mr. Austin H. Henry, Business Manager, FASEB, 9650 Rockville Pike, Bethesda, MD 20814 (301-530-7082).

The FASEB Journal (ISSN 0892-6638) is published 14 times a year, monthly except 3 issues in February (February 1; and February 9 and 15, Abstracts), by FASEB, 9650 Rockville Pike, Bethesda, MD 20814. Second-class postage paid at Bethesda, Maryland, and at additional mailing offices. Postmaster: Send address changes to The FASEB Journal, 9650 Rockville Pike, Bethesda, MD 20814.

Subscription price U.S.: members of Corporate Societies $15.00 per year; members of Affiliate Society $25.00 per year; nonmembers (personal) $80.00 per year; Institutional $180.00 per year; Student $40.00 per year with certification. Outside U.S. add $35.00 postage. All subscriptions entered on a calendar year basis only and payable in advance. Single issues, except Abstracts issues, $15.00. Subscriptions and orders should be sent to The FASEB Journal, Subscription Department, 9650 Rockville Pike, Bethesda, MD 20814 (301-530-7027). In Japan, contact USACO Corp., 13-12 Shinbashi 1-Chome, Minato-Ku, Tokyo, 105 Japan; telex J26274; fax 03-593-2709.
The state-of-the-art PCR laboratory manual!

edited by
Michael A. Innis, David H. Gelfand, and John J. Sninsky
Cetus Corporation, Emeryville, California

Thomas J. White
Hoffmann-LaRoche, Inc., Emeryville, California

The correct procedures that you need for frustration-free PCR methods and applications are contained in this complete, step-by-step, clearly written, inexpensive manual.

This first-rate guide will help you:
▼ Avoid contamination—with specific instructions on setting up your lab
▼ Avoid cumbersome molecular biological techniques
▼ Discover new applications

We sense any blood flow that you care to measure...

**RAPID-FREEZING CARDIAC BIOPSY DRILL**

The Alko Model 950 Pneumatic Biopsy Drill obtains tissue samples from research animals. This high speed cutting mechanism is combined with a specimen container where instant freezing occurs, eliminating extra handling or cellular deterioration of the specimen. The drill, which has no electrical components, obtains 2mm, 3mm, and 4mm samples.

- Biopsies cut and frozen instantly
- Minimizes sample distortion
- Eliminates extra handling
- No Electrical Components

In Appreciation

The Editorial Board appreciates the help of all who have worked for *The FASEB Journal* during the last year. Below are the names of those who reviewed manuscripts submitted for publication. The work of such referees in helping maintain the journal's standards of publication and ensuring clear and accurate reporting is indispensable. Our sincere thanks to all of you. In turn, the Federation is grateful to the members of the Editorial Board who have served and whose names are recorded on the Table of Contents page of each issue.

The FJ calendar lists open meetings of a biological topic occurring anywhere in the world. Because of deadline restrictions, we list only meetings taking place more than 3 months after we receive an announcement. Meetings, symposia, and workshops will be included up to 2 years in advance of receipt; international congresses are included up to 3 years in advance. If you would like us to announce your meeting in The FASEB Journal, please include the date and year of the meeting, its title and location, and a contact name and address and send it to FJ Calendar. The FASEB Journal, FASEB, 9650 Rockville Pike, Bethesda, MD 20814 USA.

A comprehensive FJ Calendar is published 4 times a year (January, April, July, and October). New listings appear in the other months. FJ denotes new listing.

JANUARY 1990
3-5 Winter Meeting of the Pathological Society of Great Britain and Ireland, Wolfson Conference Centre, Hammersmith Hospital, London, UK. Prof. N. A. Wright, Dept. of Histopathology, Royal Postgraduate Medical School, Hammersmith Hospital, Du Cane Rd., London W12 ONN, UK.

FEBRUARY 1990
25 Feb. 29th International Industrial -1 Mar. Pharmacy Conference on National and International Issues in Drugs and Biologies Regulations, Barton Creek Conference Center, Austin, Texas. Dr. Salomon Stavchansky, Div. of Pharmaceuticals, Coll. of Pharmacy, U. of Texas at Austin, Austin, TX 78712, USA.

MARCH 1990

JUNE 1990
25-28 Molecular and Cellular Mechanisms of Alcohol and Anesthetics, University of Calgary, Calgary, Alberta, Canada. Conference Dept., The New York Academy of Sciences, 2 E. 63rd St., New York, NY 10021, USA.

JULY 1990

2-6 Third Gordon Research Conference on the Biochemistry and Molecular Biology of Methanogenic Bacteria, Plymouth State College, Plymouth, New Hampshire. Dr. R. Gunsalus, Dept. of Microbiology, 5304 LS, UCLA, Los Angeles, CA 90024, USA.

18-22 International Conference on the Biological Function of Glycosphingolipids, Santa Barbara Miramar Resort Hotel, Santa Barbara, California, USA. Glyn Dawson, Dept. of Pediatrics, Box 82, U. of Chicago, 5841 S. Maryland Ave., Chicago, IL 60637, USA.

18-28 NATO Advanced Study Institute on Vascular Endothelium: Physiological Basis of Clinical Problems, Corfu Hilton, Corfu, Greece. Dr. John D. Catravas, Dept. of Pharmacology and Toxicology, Med. Coll. of Georgia, Augusta, GA 30912, USA.

23-27 Expanding Frontiers in Polypeptide and Protein Structural Research, Whistler, British Columbia, Canada. V. Renugopalakrishnan, Ender-12, Orthopedic Research, Childrens Hospital, 300 Longwood Ave., Boston, MA 02115, USA.

AUGUST 1990
5-10 Third International Vasopressin Conference, Montpellier, France. Dr. Rex L. Jamison, U. of Rochester Sch. of Med. and Dentistry, 601 Elmwood Ave., PO. Box MED, Rochester, NY 14642, USA.

6-17 NATO Advanced Study Institute on Biological Signal Transduction, Spetsai, Greece. Dr. Elliott M. Ross, Dept. of Pharmacology, U. of Texas Southwestern Med. Center, 5323 Harry Hines Blvd., Dallas, TX 75235, USA.

OCTOBER 1990

21-25 Third North American International Society for the Study of Xenobiotics Meeting on Modern Perspectives in Xenobiotic Metabolism, Hotel del Coronado, San Diego, California, USA. Ms. Nancy Holahan, USSR Administrative Officer, P.O. Box 3, Cabin John, MD 20818, USA.

NOVEMBER 1990
