Public Affairs
NIH Funding: Good News, Bad News ........................................ 2953

News
Highlights: APS Joint Specialty Meeting .................................... 2955
FASEB Summer Research Conferences ....................................... 2958
In Brief .................................................................................. 2960

Reviews
Control of glycogen synthase by hierarchal protein phosphorylation. P. J. Roach .................................................. 2961
Metabolism of carotenoid pigments in birds. A. H. Brush ............. 2969
Molecular pathology of glucose-6-phosphatase. A. Burchell ........ 2978
Cellular signaling by peptides of the endothelin gene family. M. S. Simonson and M. J. Dunn .................... 2989
Cyclic GMP and photoreceptor function. R. N. Lolley and R. H. Lee 3001
An enzyme with a double identity: purple acid phosphatase and tartrate-resistant acid phosphatase. J. B. Vincent and B. A. Averill ............. 3009

Research Communications
Cytochalasins B induces cellular DNA fragmentation. M. A. Kolber, K. O. Broschat, and B. Landa-Gonzalez ................. 3021
A common ancestor for Candida tropicalis and dehydrogenases that synthesize antibiotics and steroids. M. E. Baker ......................... 3028

Methodology
Molecular mapping of pulmonary endothelial membrane glycoproteins of the intact rabbit lung. M. P. Merker, W. W. Carley, and C. N. Gillis .................................................. 3040

Errata .................................................................................... 3049

Membership ........................................................................... 3050

Letter to the Editor
Improved Federal Research Support—National Information Campaign. J. H. Weisburger .................................................. 3051

Calendar ................................................................................ 3052

Books .................................................................................... 3054

New Products & Literature ..................................................... 3055

Employment Opportunities .................................................... 3057

The FASEB Journal is the Official Publication of the Federation of American Societies for Experimental Biology • The American Physiological Society • American Society for Biochemistry and Molecular Biology • American Society for Pharmacology and Experimental Therapeutics • American Association of Pathologists • American Institute of Nutrition • The American Association of Immunologists • The American Society for Cell Biology
Biogenesis
Transduction of receptor signal into modulation of effector activity by G proteins: the first 20 years or so . . .
L. Birnbaumer

Reviews
Doxorubicin cardiotoxicity: analysis of prevailing hypotheses.
R. D. Olson and P. S. Mushlin
Heart failure: mechanisms of cardiac and vascular dysfunction and the rationale for pharmacologic intervention.
G. S. Francis and J. N. Cohn
In vivo models of arterial thrombosis and thrombolysis.
L. R. Bush and R. J. Shebuski
The new metabolism: molecular genetics in the analysis of metabolic regulation.
A. G. Goodridge

Research Communications
Inverse correlation between steady-state RNA and cell surface T cell receptor levels.
J. E. Maguire, S. A. McCarthy, A. Singer, and D. S. Singer
Active oxygen species mediate asbestos fiber uptake by tracheal epithelial cells.
J. Hobson, J. L. Wright, and A. Churg
Scanning tunneling microscopic images show a laminated structure for glycogen molecules.
X. Yang, M. A. Miller, R. Yang, D. F. Evans, and R. D. Edstrom

Methodology
Viewing molecules with scanning tunneling microscopy and atomic force microscopy.
R. D. Edstrom, X. Yang, G. Lee, and D. F. Evans
Establishment and characterization of a clonal line of parathyroid endothelial cells.

COVER: The Gouldian finch (Poephila pugilae) is one of Australia’s most attractive birds. The species occurs in grasslands across the warmer parts of northeast Australia and prefers bright sunshine during the heat of the tropical day. There are three color morphs. As a consequence of their popularity as cage birds, feathers are available for study on the genetics of the facialmorphs and chemistry of the plumage pigments. The species provides an unusual example of metabolic partitioning of feather pigments. See Brush, page 2969. (Photographer: Sid Lipschutz.) Reprinted with permission of Visual Resources for Ornithology.)

Designed to report on rapidly changing developments in biological sciences, The FASEB Journal publishes brief, definitive, original research communications and state-of-the-art reviews, as well as editorials, letters, a book list, news items, calendar, public affairs, and employment opportunities. The views expressed in articles are those of the authors and not necessarily those of the Federation. All manuscripts are subject to review and approval by the Editors before publication. Copyright © 1990 by the Federation of American Societies for Experimental Biology. Printed at Lancaster Press, Lancaster, Pennsylvania. All rights reserved. Requests for any reproduction of copyrighted material except the first page of a regular article should be made in writing to the Executive Editor, The FASEB Journal, 9650 Rockville Pike, Bethesda, MD 20814, USA and should include an explicit statement of intended use and detailed specification of the material to be reproduced. Telephone 301-530-7100. COPYRIGHT: An individual may make a single copy of an article for personal use. The code at the bottom of the first page of an article indicates the copyright owner's consent that additional copies of the article may be made provided that the stated fee is paid through the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA.

Original communications or proposals for reviews, prepared as described in the Information for Authors (see volume 3, no. 1), should be sent to the Editor-in-Chief, Dr. W. J. Whelan, The FASEB Journal, P.O. Box 016129, Miami, FL 33101-8129, USA, or if a private courier is used, to the University of Miami School of Medicine, Room 6052, 1600 NW 10th Avenue, Miami, FL 33136-1015, USA.

Business matters should be directed to Mr. Austin H. Henry, Business Manager, FASEB, 9650 Rockville Pike, Bethesda, MD 20814, USA (301-530-7002).

Employment Opportunities inquiries should be directed to the FASEB Placement Service, 9650 Rockville Pike, Bethesda, MD 20814 (301-530-7200).

The FASEB Journal (ISSN 0889-6638) is published 15 times a year, monthly except 3 issues in February (February 1; and February 26 and 28, Abstracts), and 2 issues in April (April 1; and April 28, Abstracts) by FASEB, 9650 Rockville Pike, Bethesda, MD 20814, USA. Second-class postage paid at Bethesda, Maryland, and at additional mailing offices. Postmaster: Send address changes to The FASEB Journal, 9650 Rockville Pike, Bethesda, MD 20814.

Subscription price U.S.: members of Corporate Societies $15.00 per year; members of Affiliate Society $40.00 per year; nonmembers (personal) $90.00 per year; Institutional $200.00 per year; Student $45.00 per year with certification. Outside U.S. add $40.00 postage. All subscriptions entered on a yearly calendar basis only and payable in advance. Single issues, except Abstracts issues, $18.00. Subscriptions and orders should be sent to The FASEB Journal, Subscription Department, 9650 Rockville Pike, Bethesda, MD 20814 (301-530-7207).
