COMPLETE LIFE CYCLE OF CANID TAPEWORM IN RODENTS

In this issue: Isoprenylated proteins • Glia maturation factor β • Body weight regulation
IgG-binding Fc receptors • Microtubule dynamics
From the beginning, the journal of choice—

GENETICS

For seventy-five years, GENETICS has chronicled extraordinary progress in heredity and variation.

Professionals in the biological sciences need a resource—a comprehensive overview of research in this exciting, world-altering discipline.

The journal of choice: GENETICS

In addition to a monthly update on original research of high scientific merit, your annual subscription includes:

- Announcements of meetings, events and news vital to the genetics community
- Perspectives—featuring lively anecdotal, historical and critical commentary.
- Notices of current employment opportunities
- Annual records, proceedings and reports of the Genetics Society of America
- Letters to the editor—on topics ranging from basic research and theory to social and ethical issues

Editor: John W. Drake, Chapel Hill, North Carolina

GENETICS is published monthly as the official journal of the Genetics Society of America. Membership in the Society includes a subscription to GENETICS: Regular member, $60; graduate student, $30. For further membership information, please contact the Genetics Society of America, 9650 Rockville Pike, Bethesda, Maryland 20814; telephone (301) 571-1825, fax (301) 530-7079.

Nonmember one-year subscription rates: $230 domestic, $240 outside the United States of America. Subscriptions are entered on a calendar-year basis only. To order, send check or money order (U.S.A. funds only) to GENETICS, 428 East Preston Street, Baltimore, Maryland 21202; telephone (800) 638-6423; in Maryland, call collect (301) 528-4105.

The Miami BIO/TECHNOLOGY Winter Symposium
Advances in Gene Technology:
The Molecular Biology of Human Genetic Disease
January 27-February 1, 1991
Fontainbleau Hilton Hotel, Miami Beach, Florida, USA

Genetic disease genes  Viral vectors
DNA sequencing technology  Animal model systems
Physical mapping of human DNA  Progress towards gene therapy
Cancer-related genes  Diagnostic technology

The Feodor Lynen Lecturers: Francis S. Collins and Louis M. Kunkel
Distinguished Service Award: Victor A. McKusick
Special Achievement Award: Paul Berg

Please Note: Each of the ten lecture sessions* will include short oral presentations selected from submitted posters. Titles and abstracts of poster presentations will be published in an independent volume and full citations will be published in the January 1991 issue of Bio/Technology.

If you wish to receive a program, registration forms, or poster session information, please write to The Miami Bio/Technology Winter Symposia, P.O. Box 016129, Miami, FL 33101-6129, USA. Or call toll-free, 800-MIA-GENE (800/642-4363). Or fax us at 305/324-5665.

*The full symposium schedule will be regularly published in Nature from its June 28 issue and in Bio/Technology from its July issue.
The biomedical research community demands precision. It demands quality. It demands variety. It demands service. A new company has been established to meet these demands.

Introducing Biomedical Research Instruments, Inc.

Many of the nation’s leading public and private research institutions have already recognized BRI as their first choice for surgical instrument supply.

Quality
BRI instruments are among the finest manufactured in the world. Their quality is fully guaranteed. If any defects in workmanship are found in a BRI instrument, we will replace or repair it.

Variety
BRI offers hundreds of precision surgical instruments to meet the spectrum of biomedical research and laboratory needs. Every instrument is clearly illustrated and described in our comprehensive catalogue.

It includes a complete range of micro dissecting instruments, operating scissors, retractors, forceps, Dumont tweezers, bone instruments and carbide instruments.

Service
Our experienced staff is committed to providing knowledgeable and courteous attention to customer service requests. Your orders will be filled promptly from our extensive on-hand inventory.

Call us at our toll free number to request a catalog or place an order.

ATTEND A WORKSHOP THAT COUNTS

Count on learning statistical concepts and techniques
When you attend an SCI Workshop, you can count on learning all of the statistical and mathematical concepts needed for pharmacokinetic (PK) and bioavailability/bioequivalence studies — in just a few days. These comprehensive workshops tackle the theory, techniques, and even hands-on applications of PK modeling and bioavailability analysis. What’s more, these courses introduce you to some of the industry’s most recognized software products: SCI’s PCNONLIN and BIOFAK.

from instructors counted as leaders in the field
SCI’s workshop instructors, Dr. Carl Metzler, Dr. Dan Weiner, and Dr. W.A. Ritschel, are widely recognized for their countless academic and professional contributions to the field of pharmaceutical research. They share this great wealth of experience through instructional lectures, topical discussions, and hands-on training workshops.

at a workshop that counts for educational credit.
SCI’s 5th workshop series has been approved by the University of Kentucky’s College of Pharmacy, an ACPE-approved provider. By attending an SCI workshop, you are eligible to receive credit for continuing education contact hours.

In Appreciation

The Editorial Board appreciates the help of all who have worked for The FASEB Journal during the last year. Below are the names of those who reviewed manuscripts submitted for publication. The work of such referees is indispensable in helping maintain the journal's standards of publication and ensuring clear and accurate reporting. Our sincere thanks to all of you. In turn, the Federation is grateful to the members of the Editorial Board who have served and whose names are recorded on the Table of Contents page of each issue.
