ARKANSAS TOXICOLOGY SYMPOSIUM

December 10-11, 1992

HONORING THE RESEARCH CONTRIBUTIONS OF

Elizabeth C. Miller, Ph.D. & James A. Miller, Ph.D.

KEYNOTE ADDRESS:
Research with Elizabeth Miller in Chemical Carcinogenesis
James A. Miller, Ph.D. (U. of Wis.)

Metabolic Activation
F. Peter Guengerich, Ph.D. (Vanderbilt)
Fred F. Kadlubar, Ph.D. (NCTR)

Determination of Adducts and Molecular Epidemiology
Kurt Randerath, M.D. (Baylor)
Miriam C. Poirier, Ph.D. (NIH)
Steven R. Tannenbaum, Ph.D. (MIT)

Mutation Profiles of an Ultimate Carcinogen
Alan H. Corney, Ph.D. (Rutgers)

Monoclonal Antibodies to the Cytochrome P-450s
Harry V. Gelboin, Ph.D. (NIH)

Methylation and Hepatocarcinogenesis
Lionel A. Poirier, Ph.D. (NCTR)

Genetics of Hepatocarcinogenesis
Norman R. Drinkwater, Ph.D. (U. Wis.)

Promotion and Progression in Chemical Carcinogenesis
Henry C. Pitot, M.D., Ph.D. (U. Wis.)

Oncogenes and Tumor Suppressor Genes: Prospectives In Chemical Carcinogenesis
Curtis C. Harris, M.D. (NIH)

PRESENTED BY THE UNIVERSITY OF ARKANSAS FOR MEDICAL SCIENCES
LITTLE ROCK, ARKANSAS

Preregistration must be received by November 10, 1992.
No registration fee will be charged.
For additional information contact:
J.A. Hinson,
Division of Toxicology, UAMS, Slot 638,
4301 W. Markham, Little Rock, AR 72205
(501) 686-5766; Fax (501) 686-5521

Sponsored by The Dorothy Snider Foundation

Bruhn, John G. & George Henderson—VALUES IN HEALTH CARE: Choices and Conflicts. ’91, 420 pp. (7 x 10), 15 ill., 12 tables, $59.75.

Dronamraju, Krishna R.—THE FOUNDATIONS OF HUMAN GENETICS. ’89, 226 pp. (7 x 10), 32 ill., 5 tables, $45.00.

Ashmead, H. DeWayne, Darrell J. Graff & Harvey H. Ashmead—INTESTINAL ABSORPTION OF METAL IONS AND CHELATES. ’85, 262 pp., 77 il., 28 tables, $35.50.

McCulloch, James A.—A MEDICAL GREEK AND LATIN WORKBOOK. (2nd Ed.) ’84, 212 pp., $24.00, spiral (paper).

Major, Ralph H.—CLASSIC DESCRIPTIONS OF DISEASE: With Biographical Sketches of the Authors. (3rd Ed., 7th Ptg.) ’78, 712 pp. (6¼ x 9½), 142 il., $93.00.

Mann, Robert W. and Sean P. Murphy—REGIONAL ATLAS OF BONE DISEASE: A Guide to Pathologic and Normal Variation in the Human Skeleton. ’90, 224 pp. (7 x 10), 103 il., 4 tables, $38.75.

Persaud, T.V.N.—ENVIRONMENTAL CAUSES OF HUMAN BIRTH DEFECTS. ’90, 194 pp. (6¾ x 9½), 31 il., 23 tables, $34.75.

Comatzer, W. E.—ROLE OF NUTRITION IN HEALTH AND DISEASE. ’89, 438 pp. (7 x 10), $69.25.

Weiss-Lambrou, Rhoda—THE HEALTH PROFESSIONAL’S GUIDE TO WRITING FOR PUBLICATION. ’89, 160 pp. (7 x 10), 2 il., 12 tables, $32.75.

Bennett, Kenneth A.—A FIELD GUIDE FOR HUMAN SKELETAL IDENTIFICATION. ’87, 98 pp. (8½ x 11); 7 il., 55 tables, $25.50, spiral (paper).

Williams, Melvin H.—NUTRITIONAL ASPECTS OF HUMAN PHYSICAL AND ATHLETIC PERFORMANCE. (2nd Ed.) ’85, 576 pp. (6¼ x 9½), 11 il., 46 tables, $79.50.

Petty, Clayton—RESEARCH TECHNIQUES IN THE RAT. ’82, 382 pp., 178 il., 18 tables, $49.25.

Mohanty, Sashi B.—ELECTRON MICROSCOPY FOR BIOLOGISTS. ’82, 376 pp., 206 il., $53.25.

Spencer, Francis M. & Lee S. Monroe—THE COLOR ATLAS OF INTESTINAL PARASITES. (2nd Ed.) ’82, 176 pp., 263 il. (256 in color), 1 table, $45.25.

Hammer, Kathryne—NERVE CONDUCTION STUDIES. ’82, 166 pp. (8½ x 11), 73 il., 2 tables, $29.25, spiral (paper).

Randolph, Theron G.—HUMAN ECOLOGY AND SUSCEPTIBILITY TO THE CHEMICAL ENVIRONMENT. (7th Ptg.) ’81, 160 pp., 1 il., 1 table, $26.50.

Jefferies, William McK.—SAFE USES OF CORTISON. ’81, 214 pp., 8 il., $37.00.

Osler, William—A WAY OF LIFE. An Address Delivered To Yale Students Sunday Evening, April 20th, 1913. ’69, 54 pp. (5½ x 8), 2 il., $14.75.
During the 1980s significant progress was made in understanding the molecular mechanisms of the central nervous system. Genes responsible for the ion channels through which neural connections are made have been cloned, as have genes for many neurotransmitter receptors, including those for acetylcholine, serotonin, norepinephrine and dopamine. The messenger and second messenger systems of the nervous system have been defined. The genetics of neurological disorders such as the muscular dystrophies and Huntington’s disease began to yield to molecular dissection.

**Nature’s conference will explore intriguing questions facing Neuroscience in the 1990’s.**

- How does the developing embryo know which way is up?
- What are the neural mechanisms that make it possible to perceive color and taste and smell?
- What happens to the brain when it can no longer integrate information from the environment, as occurs in people with Alzheimer’s disease?

**Among the topics will be:**

- Gene therapy for the brain
- Cortical organization of the five senses
- Neuronal cell suicide
- Using “gene knock-out” techniques to decipher early mammalian development
- Molecular analysis of cell lineage and neuronal migration in the CNS

We are looking for lively audience participation in the discussions, and invite you to take advantage of our reduced registration fee.

We hope to see you in Boston!
You are cordially invited to take advantage of a special offer for a place at this year’s NATURE conference.

CONFERENCE SESSIONS

I. Neuroscience in Medicine
Chair: W. Maxwell Cowan
Howard Hughes Medical Institute
Marcus Raichle
Washington University
Mario R. Capecchi
University of Utah
Dennis Selkoe
Harvard Medical School
David E. Housman
Massachusetts Institute of Technology
Fred H. Gage
University of California, San Diego

II. Sensation: Vision, Hearing, Smell
Chair: David H. Hubel
Harvard Medical School
James Hudspeth
University of Texas, Southwestern Medical Center, Dallas
Jeremy Nathans
Johns Hopkins University School of Medicine
Richard Axel
Columbia University College of Physicians and Surgeons

III. Neuronal Death
Chair: Martin C. Raff
University College London
H. Robert Horvitz
Massachusetts Institute of Technology
Eugene Johnson
Washington University School of Medicine
Solomon H. Snyder
Johns Hopkins University School of Medicine

IV. Development and Plasticity
Chair: Carla J. Shatz
University of California, Berkeley
Connie L. Cepko
Harvard Medical School
Thomas M. Jessell
Columbia University College of Physicians and Surgeons
Corey S. Goodman
University of California, Berkeley
Martha Constantine Paton
Yale University School of Medicine

Commentator: Colin Blakemore
Oxford University

NATURE CONFERENCE REGISTRATION FORM
Nature 15th International Conference
November 12-13, 1992, Copley Plaza Hotel, Boston

Registration Fees
Standard rate including reception: $495; Walk-in rate: $595
Special rate for full-time academics and government employees only: $395; Walk-in rate: $595

Name __________________________________________ Title __________________________
Organization __________________________________________
Address __________________________________________
City/State/Zip __________________________ Country __________________________
Telephone __________________________
☐ Please charge my credit card ☐ AMEX ☐ VISA ☐ MasterCard Card # __________
☐ Check enclosed drawn on US Bank
Expiration Date __________

To Register mail this form to: Diana Berger, Nature Publishing Company, 65 Bleecker Street, New York, NY 10012
Tel. 212-477-9699 Fax. 212-505-1364

Cancellation policy: All Cancellations must be received in writing. Cancellations received before October 1 will be subject to a service charge of $25. No refunds will be made after that date. Registrants who are unable to attend may, if they choose, send a substitute.
Sponsor’s Liability: Should this conference be cancelled or postponed for any reason, the sponsor’s liability is limited to the return of the registration fee.

AIRLINE INFORMATION
1. Delta Airlines (800) 221-1212 Special Meeting Network. Daily between 8:30 a.m. - 11 p.m. EST. Refer to file #P22080, or
2. VTS Travel (800) 366-2496 and ask for Gary Senor.

RETURN NOW TO QUALIFY FOR THIS REDUCED RATE AND SAVE $100 OR MORE.
This equation heralded the start of a scientific revolution

\[ I = C_M \frac{dV}{dt} + \bar{g}_K n^4 (V-V_K) + \bar{g}_{Na} m^3 h (V-V_{Na}) + \bar{g}_l (V-V_l) \]

...a revolution that continues to the present day — and beyond!

**FOURTY YEARS OF MEMBRANE CURRENT IN NERVE**

Guest Editor: Daniel Gardner, Cornell University Medical College

This coordinated set of modern reviews commemorates the fortieth anniversary of the publication of the Hodgkin, Huxley and Hodgkin, Huxley, and Katz papers. It examines, from a contemporary perspective, the near-universal influence of these pivotal physiological works. Present and future views of ions, channels, and membranes in all tissues reflect the quantitative description of currents in squid axon.

These invited reviews update the intellectual as well as the membrane currents that the seminal papers presented. Comprehensive and comparative articles explore key links to such wide-ranging concepts as molecular biology, the matching of theory to experimental data, and the nature of voltage dependence.

*Forty Years of Membrane Current in Nerve* is destined to become a standard reference for teaching and research, not only in physiology but also in neuroscience, cell and molecular biology, membrane biophysics, and mathematical biology.

Anticipating the publication's wide appeal, the American Physiological Society is making this special supplement of *Physiological Reviews* available to nonsubscribers for only $29.00. Order now to reserve your copy.

Order from the publisher: American Physiological Society • 9650 Rockville Pike • Bethesda, MD 20814-3991
