State-of-the-Art Reviews in the November Issue of The FASEB Journal

A two-signal model for regulation of immunoglobulin isotype switching. J. Purkerson and P. Isakson
Regulation of glucose transport in skeletal muscle. R. J. Barnard and J. F. Youngren
Receptor tyrosine kinase substrates src homology domains and signal transduction. G. Carpenter
Regulation of transferrin gene expression. M. M. Zakin
The thrombospondins: structure and regulation of expression. P. Bornstein

Structural basis of antigenic specificity and design of new vaccines. R. Amon and M. H. V. Van Regenmortel
SAPA/trans-sialidase and cruzipain: two antigens from trypanosoma cruzi contain immunodominant but enzymatically inactive domains. J. J. Cazzulo and A. C. C. Frasch
Transcription by RNA polymerase II: initiator-director formation of transcription-competent complexes. L. Weis and D. Reinberg
Tyrophostins:tyrosine kinase blockers as novel antiproliferative agents and dissectors of signal transduction. A. Levitzki

Original communications or proposals for reviews, prepared as described in the Information for Authors (see volume 5, no. 2), should be sent to the Editor-in-Chief, Dr. W. J. Whelan, The FASEB Journal, P.O. Box 16129, Miami, FL 33101-6129, USA. All subscriptions and orders should be sent to The FASEB Journal, Subscription Department, 9990 Rockville Pike, Bethesda, MD 20814-3027. In Japan, contact USACO Corp., 13-12 Shinbash 1-Chome, Minato-Ku, Tokyo, 105 Japan; tel. 03/3277; fax 03-353-2709.
