Mechanisms of excitotoxicity in neurologic diseases. M. F. Beal
Cell-specific expression of cytosolic phosphoenolpyruvate carboxy-
kinase in transgenic mice. E. G. Beale, D. E. Clougherty, and
R. E. Hammer
Endowing T cells with antibody specificity using chimeric T cell recep-
tors. G. Gross and Z. Eshhar
alpha2-Macroglobulin, a multifunctional binding protein with targeting
characteristics. W. Borth
Camitine function and requirements during the life cycle.
C. J. Rebouche
New insights into chromatin function in transcriptional control.
A. P. Wolff
Complexity of FGF receptors: genetic basis for structural diversity and
functional specificity. D. Givol and A. Yayon
Forces involved in the assembly and stabilization of membrane pro-
teins. W. A. Cramer, D. M. Engelman, G. von Heijne, and
D. C. Rees
The Src family of tyrosine protein kinases in hematopoietic signal trans-
duction. J. B. Bolen, R. B. Rowley, C. Spane, and A. Y.
Tsagkakov
Cytokine receptors and signal transduction. T. Tache and T. Kishimoto

The New Age of RNA
January 1993 — Thematic Issue
Coordinators: Michael W. Gray and Robert Cedergren

Recent studies of ribonuclease P
Trans-splicing of pre-mRNA in plants, animals, and protists
In vitro selection and evolution of RNA: applications for catalytic RNA,
molecular recognition, and drug discovery
Modeling the three-dimensional structure of RNA
Chemically modified RNA: approaches and applications
RNA editing in plant mitochondria and chloroplasts
RNA editing in kinetoplastid mitochondria
Group I and group II introns
Small nuclear RNAs in messenger RNA and ribosomal RNA
processing
Transfer RNA identity
tRNA-RNA interactions and peptidyl transferase
Self-cleaving catalytic RNA
How many catalytic RNAs? Ions and the Cheshire cat conjecture
Ribosomal RNA: a key to phylogeny
Recognition of tRNAs by aminocyl-tRNA synthetases

PUBLICATIONS COMMITTEE
F. W. Hill (AIN), Chairperson
J. A. Williams (APS)
A. Ginsburg (ASBMB)
R. R. Ruffolo (ASPET)
T. W. Tillack (ASIP)
D. T. Facon (AAAS)
